Patrik Kusnir

About Me

I currently work at the pharmaceutical company KRKA in the Quality Assurance (QA) department. My main role is to coordinate change control quality system, qualification of laboratory and technological equipment and verification of microbiological procedures and methods.

At the Synthesit Research Center, I participated in creating scientific publications and provided consultations to patients. I also successfully carried out tasks related to translating scientific literature and supported colleagues with scientific matters.

At JTI Poland, I searched for and analyzed toxicological information, prepared toxicological documentation, and supported classification of components for regulatory authorities.

Work Experience

Oct 2024 – Present — Quality Assurance Specialist

KRKA-RUS, Istra, Russia

I currently work as a Quality Assurance Specialist at the Russian branch of the pharmaceutical company KRKA. I am responsible for change control quality system across the company, validation and qualification of laboratory instruments and manufacturing equipment. I also check and confirm verification of microbiological methods protocols and deviations in climatic parameters.

Oct 2023 – Jan 2024 — Medical Research Scientist

Scientific Research Center Synthesit, Sochi, Russia

I wrote scientific articles about iron citrate supplements in English and published them in European

scientific journals. I provided basic patient consultation and advisory.

I translated articles from English to Russian and vice versa. Also I supported my non-medical colleagues in my professional expertise.

Jun 2021 – Oct 2022 — Toxicology Information Manager

JTI Poland, Warsaw, Poland

I searched scientific databases and literature to collect toxicological, classification, and labeling information related to components used/to be used in JTI products

I read scientific articles, documentation, reports, etc., and assessed the relevance of published toxicological information.

I prepared and continuously updated toxicological documentation on ingredient toxicity for tobacco products.

I supporting annual classification and labeling of ingredients for our portfolio to support successful chemical registration.

Sep 2017 – Mar 2021 — PhD Student, Department of Pharmacology

Jessenius Faculty of Medicine, Comenius University

During my PhD studies, I was involved in teaching students of general medicine, dentistry, nursing, midwifery, and public health. I also wrote professional articles on tuberculosis and inflammatory markers, which was the topic of my research.

Education

2012 – 2017 — Pharmacy

Charles University, Faculty of Pharmacy in Hradec Králové
