

To Whom It May Concern,

Patrik Kusnir has worked in my group since June 1, 2021 as Toxicology Information Manager. During this period, he was accountable for searching scientific databases and literature to gather toxicological information to prepare and update toxicological dossiers for JTI conventional products' ingredients. These documents were subsequently submitted to worldwide regulatory agencies.

Patrik was also involved in CLP and GHS classification of the JTI's ingredients portfolio to support the SRA Chemical Regulations program. Additionally, Patrik was managing the delivery of the LD50/LC50 values update requested for maintenance of material safety data sheets.

Patrik displayed a friendly attitude and was very much liked by his peers, and he built good relationships amongst colleagues at various levels. He always collaborated well with others and treated all individuals in a fair and consistent manner. Patrik was always willing to volunteer or help with projects and tasks to actively support his colleagues.

I wish him the very best of success in the future.

If you have any additional questions, please do not hesitate to call or email me.

Sincerely,

Dr. Paulina André
