RECOMMENDATION LETTER

02.02.2024

Sochi

It is with great pleasure that I recommend Patrik Kusnir as a candidate for your vacant position in medical research. During the period of employment from 16 October 2023 to 26 January 2024, Patrik was a medical research fellow in our organization and I am confident that his knowledge, skills and professionalism will make a notable contribution to your team.

Patrik has been successful in writing scientific articles, including clinical cases and also submitted an original article, which emphasizes his ability to work independently and think creatively. His articles had a high level of research relevance and depth of analysis.

He demonstrated excellent communication skills, maintaining good friendly relationships with colleagues. Patrik was always willing to help others and share his knowledge, which created a positive atmosphere in the research center.

I would especially like to emphasize his language skills. Patrick speaks both Russian and English at a high level, which is a key advantage in a scientific environment. His ability to analyse scientific articles, hospital discharges and process data from patients make him a valuable expert in the field of medical research.

Without a doubt, Patrik Kusnir is a talented and dedicated professional in his field, and I believe his contribution to your team will be significant and valuable.

Best wishes,

/ Vladislav Aleksandrovich Karabanov /

General director of LTD. NIC Synthestech
